REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The Applicant contends, "Accordingly, Finkelstein also provides no teaching or suggestion for the first surface limitation of 'a transparent layer overlaying the information layer, wherein the thickness of the transparent layer with respect to the wavelength of the read/write laser beam is such that dust particles on the surface of the transparent layer are not defocused when reading data from the information layer with the laser beam passing through the transparent layer'". It is the applicant's contention that neither "the use of thin transparent protective films 155 and 156" in Finkelstein satisfy the requirement that "the thickness of the transparent layer with respect to the wavelength of the read/write laser beam is such that dust particles on the surface of the transparent layer are not defocused when reading data from the information layer with the laser beam passing through the transparent layer".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
